(206) 552-0380 (call or text)

### Website

launchindustries.biz/services/operations-consulting

### Best For

Small businesses with operational bottlenecks, inconsistent processes, or plans to grow their team

## WHAT WE PROVIDE

- **Operations Analysis:** A structured review of your current operations to identify bottlenecks, waste, and the highest-leverage areas to fix first.
- **Process Optimization:** Redesign inefficient workflows so tasks get done consistently, faster, and with fewer errors or handoff gaps.
- **Standard Operating Procedures (SOPs):** Written, step-by-step procedures that document how your business runs so it can scale without you.
- **Workflow Automation:** Connect your tools and automate repetitive tasks using Zapier, Make, and other no-code platforms to save hours every week.
- **Project Management:** Setup and management of ClickUp, Asana, Notion, or Monday to track work, deadlines, and accountability across your team.
- **Change Management:** Structured support for implementing new systems, tools, or processes so adoption actually happens across your team.
- **Vendor Management:** Evaluate vendors, consolidate contracts, improve terms, and ensure you are getting what you are paying for.
- **Daily Operations Support:** Fractional COO services for businesses that need an experienced operator handling day-to-day decisions and execution.
- **Software Selection:** Objective recommendations for CRMs, scheduling tools, project management platforms, and other business software.
- **Reporting & Dashboards:** Build the visibility tools your leadership team needs to understand what is working and where to focus next.
