Best For

Small businesses drowning in manual tasks, disconnected tools, or outdated technology stacks

WHAT WE PROVIDE

- **Software Selection Consulting:** Objective recommendations for CRM, scheduling, project management, accounting, and other business software tools.
- **Software Implementation & Integration:** Full setup, data migration, and system-to-system integration so your tools actually talk to each other.
- **Technology Audits:** Review your current tech stack, identify redundancies, and build a roadmap to reduce costs and improve reliability.
- **Workflow Automation:** Connect your apps and automate repetitive tasks using Zapier, Make, and other no-code platforms to save hours weekly.
- **AI Training & Adoption:** Hands-on staff training for ChatGPT, Claude, and other AI tools, tailored to how your team actually works.
- **Custom AI Assistants:** Purpose-built AI tools customized with your business knowledge to handle FAQs, drafting, and data lookup tasks.
- **Digital Transformation:** End-to-end modernization of a specific business process, from paper-based or manual to digital and automated.
- **System Integrations:** API connections, data pipelines, and custom automations that bridge the gaps between platforms your team relies on.
- **Reporting Dashboards:** Build the visibility tools your leadership needs to track KPIs, operational metrics, and business performance in real time.
- **Staff Training & Onboarding:** Live training sessions, recorded walkthroughs, and documentation for any software or process your team needs to adopt.
